

MOBILE DEVELOPER WORKING STUDENT

We are looking for a working student with some experience in react or react native development to build and improve our product that helps people quit smoking easily. No boring agency work but being part of a young startup with direct impact on the product.

YOU WILL:

- develop and improve our gamified and Bluetooth® connected app in react native
- work directly with the founders and shape our tech-driven startup
- have an impact on the product from day one
- build a product that saves peoples lives
- get all necessary resources like laptop, testdevices, tools, ...

YOUR SKILLS:

- you worked with react and/or react native before
- you are experienced in javascript or typescript
- additionally experience in android and iOS is a plus
- you are a team player and used to work with others

FLEXIBILITY. We don't keep track of hours nor do we care when or where you perform your work. We just care about your passion, your results and your impact.

WHERE? We have a hybrid work model with partial „work from home“ and flexible working hours. We want you to work in the way that fits best for you.

TECHNOLOGY THAT CHANGES THE WORLD

Every 4 seconds one person dies from the consequences of smoking. That sums up to over 8 million people a year that will leave this planet.

We, the three founders, share the passion and the vision to use newest technology to change the face of the world. That's why we founded Smokeless - a totally new and disrupting solution that will revolutionize the medical sector.

Smokeless is the first holistic solution worldwide that conquers smoking addiction based on smart technology. Our solution consists of a hardware device, as well as a software part in form of an app.

We are supported by names like Beurer medical, Hubert Burda Media, UnternehmertumX, Xpreneurs and some famous founders - come and join us to change the world.
